# Germany on the road to the European Health Data Space

Large-scale European projects (Joint Actions) are supporting the introduction of the EHDS

## Xt-EHR

## MyHealth@EU

(Lable for primary use)

### Focus

- Promoting the use of health data for primary purposes in the interest of patient care
- Creating guidelines for the development of a comprehensive, interoperable and secure electronic health data system (EHR)

### Framework

- More than 50 organisations from 25 countries
- Project duration: 30 months

### Overall objectives

- Improving patient care
- Technical specifications and implementation guides for electronic health records and system interfaces
- Preparation of the content of the EHDS

## TEHDAS2

## HealthData@EU

(Lable for secondary use)

### The focus

- Promoting the use of health data for secondary purposes such as research, innovation and policy
- Developing guidelines/technical specifications for EU-wide, secure access to and use of health data

### Framework

- More than 60 organisations from 30 countries
- Duration from May 2024 to December 2026

### Overarching objectives

- Strengthening public health,
- facilitate the development of new treatments and medicines, and
- enable more efficient use of resources

# gematik. Healthy prospects.
