➤ Exploitation of the Public/Private co-working

Investment program aid for large enterprises

-Program Contracts-

-Title II Chapter 1-

<https://por.regione.puglia.it/-/contratti-di-programma-grandi-imprese>

The European Regional Development Fund (ERDF) aims to strengthen economic, social and territorial cohesion in the European Union by correcting imbalances between its regions. In 2021-2027 it will enable **investments in a smarter, greener, more connected and more social Europe that is closer to its citizens**.

https://ec.europa.eu/regional_policy/funding/erdf_en

Through the Public Notice for aid to investment programs, the **Apulia Region supports large enterprises in investments** dedicated to:

- ✓ construction of new production units;
- ✓ expansion of existing production units;
- ✓ diversification of the production of an existing plant to obtain products never previously manufactured;
- ✓ fundamental change in the overall production process of an existing production unit.

Applications for access to the facilities must relate to investment programs, called Program Contracts, with a **total amount of expenses and eligible costs between 5 million euros and 100 million euros**.

Investments can be made in the following areas:

- manufacturing activities
- **Services**, with reference to:
 - **Scientific research and development**;
 - ...

...In case of large enterprise, may relate to **research and development projects that can be integrated with industrial projects to support the economic exploitation of innovation and industrialization of research results** or industrial projects for the **exploitation of innovative technologies** or solutions in processes, products or services and organization; ...

Research

UNIONE EUROPEA
FONDO EUROPEO DI SVILUPPO REGIONALE

Project co-funded by the European Regional Development Fund (ERDF) within the framework of the National Operational Programme "Research and Innovation" (PON R&I) 2017-2020 - Axis II - Action 2 of the Ministry of Education, University and Research

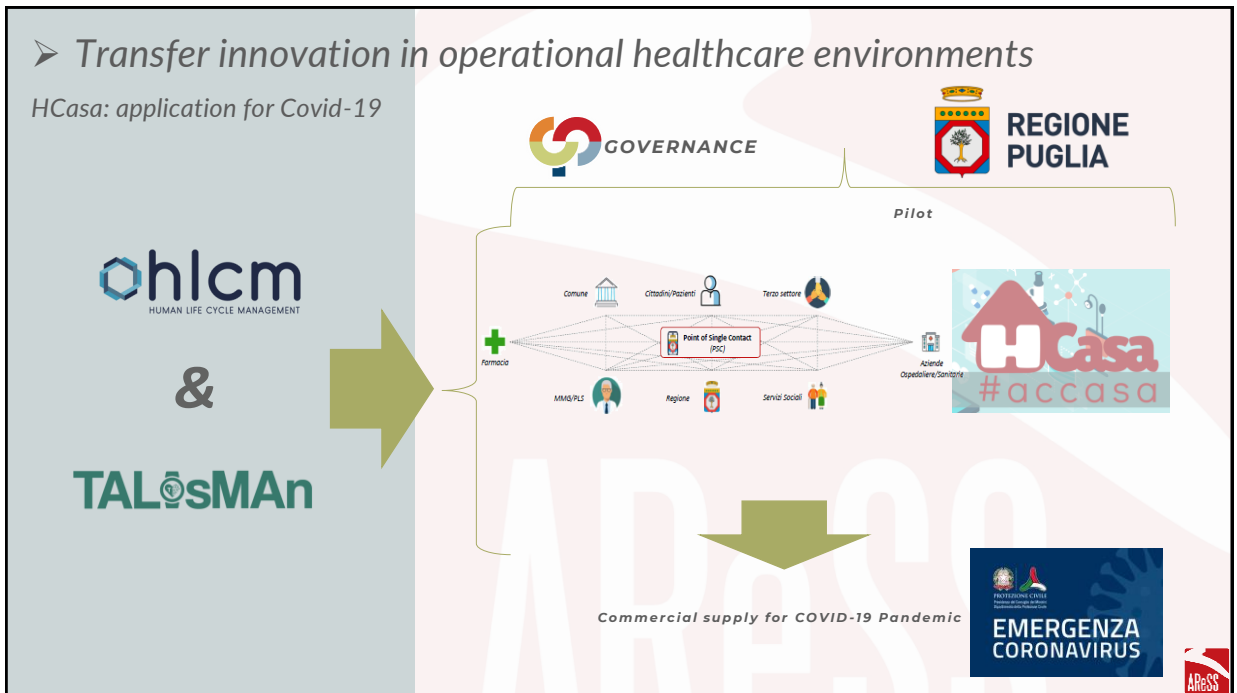

A successful public-private initiative to foster the digital transformation of clinical healthcare processes in support of continuity of care.

Have been developed technologies for personalized care and for improving quality of life of frail and chronic patients.

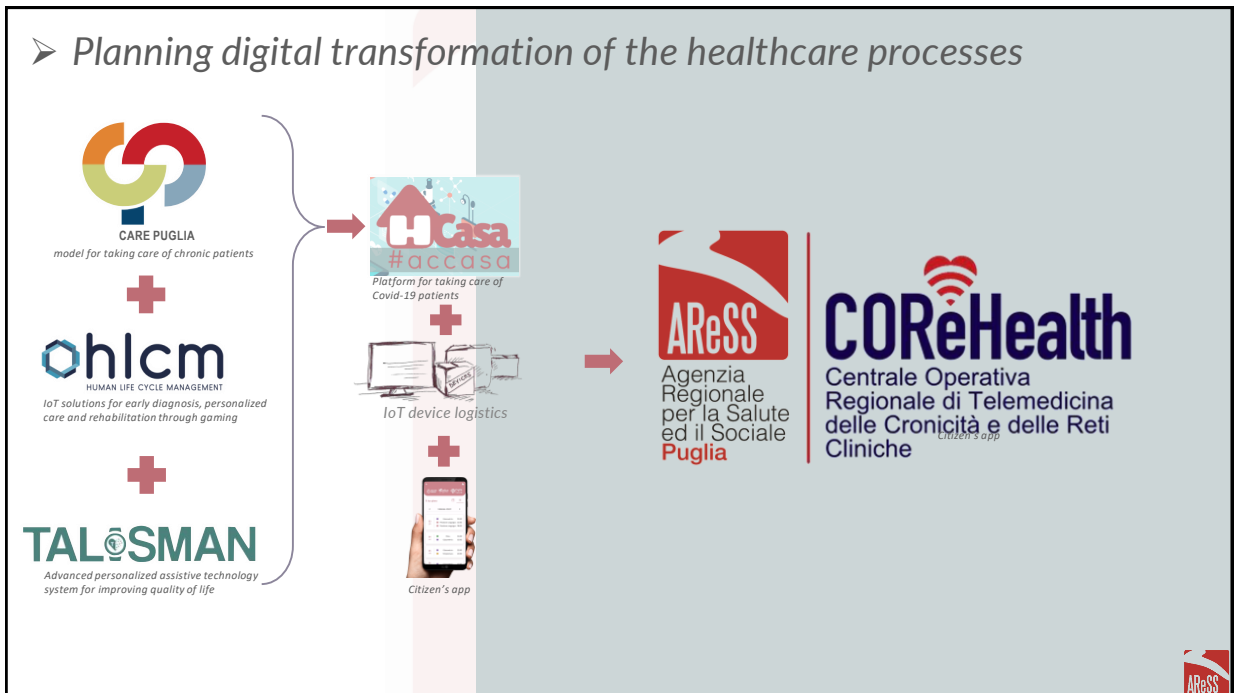

1. ARESS defined and provided care models for frail and chronic patients.
2. Research centers and innovative enterprises proposes methodologies and realizes add-values apps and services.
3. Dedalus defined a set of integration profiles (HL7 FHIR) regarding the continuum of care processes, and provided and personalized the enabling platform developed in HLCM project.
4. ARESS provided operational healthcare environments for testing before investing
